

HOMEOWNER'S ENERGY SAVINGS AGREEMENT PROGRAM

PROLONG THE LIFE OF YOUR EQUIPMENT:

Like changing the oil in your car every 3000 miles, if your equipment is serviced regularly by Northern Lakes Heating & Air Conditioning, it will last longer.

MAINTAIN THE MANUFACTURER'S PARTS WARRANTY:

Did you know that in order to maintain a manufacturer's factory warranty, your furnace and/or air conditioner is supposed to be checked annually by your authorized dealer? If it's not, the dealer may not be able to enforce the manufacturer's factory warranty.

All mechanical equipment requires professional, routine maintenance if it's going to operate safely and efficiently. Can you imagine driving 50,000 miles in your car without at least changing the oil, checking the tires and washing it a couple of times? It sure wouldn't last too long if you treated it that way!

The same thing is true with your home's heating and cooling systems. Research has proven that systems which are professionally serviced on a routine basis operate safer, provide healthier indoor air, improve occupant comfort, use less energy and last longer when compared to systems which are not properly maintained.

Benefits of Having an Energy Savings Agreement

- Peace of mind with automatic inspection
- Competent technicians at your service
- Priority scheduling on all normal repairs
- Reduce your energy bills
- Service you can trust since 1933
- No overtime premium charges
- Savings of 15% on all normal repairs
- Prolong the life of your equipment
- Maintain the manufacturer's parts warranty
